

JULIÁN ANDRÉS ROJAS GONZÁLEZ

Junior Full Stack Developer · Software Engineer

Bogotá, Colombia | +57 312 755 8773 | julis0293@gmail.com | linkedin.com/in/julianrojasgonzalez | ing-julianrojas.github.io

PROFESSIONAL PROFILE

Systems Engineering student about to graduate, with hands-on experience in full stack web development (SDLC, debugging, refactoring, QA) and personal projects deployed to production. I complement my development profile with a solid foundation in infrastructure and systems — Linux administration and Identity and Access Management (IAM) for 500+ users — giving me a comprehensive view of software, from build to production operation. Additional training in AI, cybersecurity, and Big Data through an international academic exchange at La Salle México. Seeking a junior development role where I can deepen my technical expertise on a modern stack.

TECHNICAL SKILLS

- **Languages & Web:** PHP, Laravel, JavaScript, HTML5, CSS3, SQL, Python (basic-intermediate, actively improving), Astro, React, Next.js, GSAP.
- **Development Practices:** SDLC, debugging and QA, refactoring, technical documentation, version control with Git/GitHub, REST APIs.
- **E-commerce & CMS:** WordPress/WooCommerce as a headless backend via REST API, JWT authentication, customization via WPCode.
- **Data:** Power BI, Big Data with Python/R (academic level).
- **Systems & Networks:** Linux/GNU server administration, hybrid infrastructure (Cloud and On-Premise), SLA management.
- **Identity & Security:** Identity and Access Management (IAM), cybersecurity fundamentals, CTF / ethical hacking (academic level).

WORK EXPERIENCE

Service Desk Manager — RGC Activa SAS

June 2025 – January 2026 · Remote · 8 months

- Managed Identity and Access (IAM) for 500+ collaborators, including provisioning, deprovisioning, and privilege levels.
- Performed technical diagnostics of failures in corporate web applications, acting as a direct liaison between end users and the development team.
- Optimized high-volume technical support workflows under Service Level Agreements (SLA).

Infrastructure Intern — RGC Activa SAS

December 2024 – June 2025 · Hybrid · 7 months

- Supported the administration of hybrid infrastructure (Cloud and On-Premise), contributing to business operational continuity.
- Executed backup processes and participated in disaster recovery planning to mitigate data loss risk.
- Performed corrective and preventive maintenance of hardware and software, meeting established SLA indicators.

Web Developer — Business Insights

October 2023 – April 2024 · Bogotá / Remote · 7 months

- Participated in the full software development lifecycle (SDLC), from requirements analysis to deployment.
- Performed refactoring, debugging, and quality assurance on existing web platforms using PHP and JavaScript.
- Diagnosed production incidents and produced technical documentation for the development team.

PROJECTS

Vintago — Headless E-commerce with WooCommerce — vintago.com.co

- Designed and developed the frontend in Astro and React, with scroll-based animations implemented in GSAP (ScrollTrigger).
- Implemented WooCommerce as a headless backend: the frontend consumes WooCommerce's Store REST API (catalog, cart, and checkout), with user authentication via JWT.
- Customized the backend with snippets via WPCode (cross-subdomain CORS, dark-themed checkout, JWT login integration).

Vintago.tech — E-commerce Catalog — vintago-tech.netlify.app

- Designed and deployed an e-commerce landing page with a catalog of 300+ tech products, built with Next.js and Tailwind.
- Implemented a direct-to-WhatsApp conversion flow for inquiries and orders, aimed at retail and wholesale buyers.
- Deployed on Netlify with continuous integration from a Git repository.

Dotaciones JR — CRM in Development — Personal Project

- Building a CRM for supply/equipment management (inventory, customers, suppliers, expenses, and income) with a Laravel and MySQL backend.
- Integrating DIAN electronic invoicing via the Factus technology provider (REST API) on its sandbox environment.

EDUCATION

Systems Engineering — CUN, Corporación Unificada Nacional de Educación Superior

Expected graduation: late 2026

Includes international academic exchange at La Salle México: Artificial Intelligence with Python and neural networks, offensive cybersecurity (CTF), Big Data with Python and R, Power BI.

- Software Development Technologist — CUN
- Software Programming Technician — SENA
- Systems Support Technician — CUN

CERTIFICATIONS & LANGUAGES

- GNU/Linux Server Operating System Configuration — CUN
- English — American School, level B2.1
- Spanish — Native | English — B2 (Upper Intermediate)
